RESEARCH INTERESTS

My research interests are primarily situated within the field of solid and structural mechanics with a focus on the complexities that arise when nonlinearity is involved. Within this area, I have concentrated my efforts on exploring configurational forces and the interactions between magnetic and elastic phenomena commonly referred to as magnetoelasticity. My work involves both the development of analytical models and the application of numerical simulations to verify these models, aiming to deepen the understanding of material behaviors under nonlinear conditions and complex loadings.

EDUCATION

Ph.D. - Solid & Structural Mechanics

Nov 20 - May 24

University of Trento - Trento, Italy

Thesis: *Elastic solids under frictionless rigid contact and configurational force*
Supervisors: Prof. Francesco Dal Corso and Prof. Davide Bigoni and Prof. Andrea Piccolroaz

M.Sc. - Civil Engineering

Sep 16 - Jul 20

University of Bologna - Bologna, Italy

Thesis: *The Galerkin method for vibrational problem on stepped structures*
Supervisors: Prof. Alessandro Marzani and Prof. Isaac Elishakoff

B.Sc. - Civil Engineering

Sep 12 - Oct 16

University of Bologna - Bologna, Italy

Thesis: *Experimental shear test on masonry samples: investigation on the role of prestress* (in Italian)
Supervisors: Prof. Cristina Gentilini, Prof. Stefano de Miranda and Dr. Antonio Maria D'Altri

PROFESSIONAL EXPERIENCE

Postdoctoral Researcher

Feb 24 - Present

Faculty of Civil Engineering

Czech Technical University in Prague (Prague, Czech Republic)

Project: **SOFFA ERC CZ**

I focus on *magnetorheological elastomers* (MREs), a class of smart materials that combine elastomers with magnetic particles, allowing their mechanical properties to be tuned by an external magnetic field. My work involves developing variationally consistent models to describe the behavior of these materials under various mechanical and magnetic conditions, including large deformations and instability phenomena. These models are then implemented into OOFEM, an open-source finite element software, written in C++ and developed within the department, enabling more accurate simulations of MREs in practical applications.

SKILLS

ABAQUS	3+ yrs
AutoCAD	10+ yrs
LaTeX	6+ yrs
Mathematica	5+ yrs
MATLAB	6+ yrs
Microsoft Office (Word, Excel, etc.)	10+ yrs
Teaching	4+ yrs

Doctoral Researcher

Department of Civil, Environmental and Mechanical Engineering [↗](#)
University of Trento [↗](#) (Trento, Italy)

Oct 20 - May 24

Project: **Beyond ERC-AdG** [↗](#)

My research focused on *configurational forces* in solids. I developed a theoretical model to describe these forces within static and dynamic regimes compared its predictions with the solution obtained from ABAQUS software.

Visiting Scholar

Department of Ocean & Mechanical Engineering [↗](#)
Florida Atlantic University [↗](#) (Boca Raton, Florida, US)

Aug 19 - Mar 20

Host & Supervisor: Prof. Isaac Elishakoff [↗](#)

Research internship for Master's thesis devoted to the development of the Galerkin method for stepped structures. I compared standard and generalized functions approaches by applying them to various structural elements like bars, beams and plates.

Lab Intern

Department of Civil, Chemical, Environmental and Materials Engineering [↗](#)
University of Bologna [↗](#) (Bologna, Italy)

Jun 16 - Feb 17

Experimental research for Bachelor's thesis. Experiments involved the assessment of the elastic modulus of mortar and brick materials, measurement of the flexural strength of mortar specimens, the development of pull-out tests on steel helical bars and the evaluation of the shear strength of masonry specimens.

TEACHING

Teaching Assistant

- **Scienza delle Costruzioni** (Solid Mechanics)
University of Trento [↗](#) (Trento, Italy)
AY 2021/22, 2022/23, 2023/24 | First semester | Undergraduate course
- **Meccanica Computazionale delle Strutture 2** (Computational Mechanics 2)
University of Trento [↗](#) (Trento, Italy)
AY 2021/22 | Second semester | Graduate course
- **Teoria e Dinamica delle Strutture** (Theory and Dynamics of Structures)
University of Trento [↗](#) (Trento, Italy)
AY 2020/21, 2021/22, 2022/23 | First semester | Graduate course

Guest Lecturer

- **Mechanical Vibrations**
Florida Atlantic University [↗](#) (Boca Raton, Florida, US)
AY 2019/20 | First semester | Graduate course
- **Statics**
Florida Atlantic University [↗](#) (Boca Raton, Florida, US)
AY 2019/20 | First semester | Undergraduate course

Additional Teaching Experience

- Individual tutoring to high school students in Mathematics and Physics to improve their understanding and prepare them for the tests.

AWARDS

Scholarship for Final Thesis Research Abroad
University of Bologna [↗](#) (Bologna, Italy)

Jun 19

Amount: 2 237.53 €

Awarded the scholarship under the *Scholarships for Final Thesis Research Abroad in Second-Cycle or Single-Cycle Degrees* program to support international research for a final thesis.

CONFERENCES

Presentations

NMM2024 - Conference on Nano and Macro Mechanics 
Prague, Czech Republic

Sep 12, 2024

Hard-magnetic soft materials: theory and implementation.

ICNEM - 26th International Conference on Nonlinear Elasticity in Materials 
Prague, Czech Republic

Jun 9 - 14, 2024

Efficient numerical approach to modeling of hard magnetic soft beams.

Mathematics and Mechanics of Solids and Structures - Scientific challenges and methodologies for future societal development [↗](#)

Aberystwyth, Wales, UK

Jun 7 - 9, 2023

Elastic solids moving along frictionless constraints via configurational forces.

EUROMECH - Mechanics of high-contrast elastic composites [↗](#)

Virtual Conference, Online

Sep 6 - 8, 2021

Free vibration and flutter of a multi-component beam in a supersonic flow.

ASME - International Mechanical Engineering Congress & Exposition [↗](#)

Virtual Conference, Online

Nov 16 - 19, 2020

Flutter of a beam in a supersonic flow: no need in full Timoshenko-Ehrenfest equations.
